(54) Title: REDUCED VOLUME, HIGH CONDUCTANCE PROCESS CHAMBER

(57) Abstract: A vacuum processing apparatus (10) including a process chamber (20) having a plurality of pumping ports (50), and a plurality of pumping cells (60) each connected to a respective pumping port (50) of the plurality of pumping ports (50). The plurality of pumping ports (50) is preferably located on a lower wall (26) of the process chamber (20) adjacent to a process chamber (20) volume. A process chamber (20) is also provided that includes a lower wall (26) and a side wall (28), where the side wall (28) has a height of about four inches. The vacuum processing apparatus (10) further includes a chamber liner (27) configured to displace open volume within the process chamber (20).

INTERNATIONAL SEARCH REPORT
